PRESS RELEASE

NEW GĦADIRA ROAD

The Federation for Hunting & Conservation – Malta (FKNK) is totally against any sort of destruction of the little natural habitat, be this protected by some environment legislation or otherwise, that is still available on the Maltese Islands.

In this sense the FKNK would like to encourage Government to seriously reconsider and seek more environment friendly solutions to its' existing plans to build a new road across Għadira bay that might unnecessarily destroy natural habitat in the area in the process and at the end result.

Lino Farrugia

Secretary - FKNK
