The Impact of Hunters and Trappers' Votes on the European Parliament Elections

The Federation for Hunting and Conservation – Malta (FKNK) notes with pleasure that four of the candidates to the European Parliament who had expressed interest in the FKNK and had also confirmed their intention to do their utmost to ensure that the rights of the Maltese Hunters and Trappers are safeguarded on the same level as those of their European counterparts, have been elected. Thus ensuring the future of the socio-cultural traditions of Hunting and Trapping in the Maltese islands.

The FKNK also notes the poor performance of other candidates and the Green Party who are well known for their anti-hunting beliefs.

Finally the FKNK would like to congratulate all six candidates who have been elected to represent Malta's interest in the European Parliament and augurs that at the top of their agenda, they will ensure equal, human and citizen rights for all Maltese as enjoyed by other EU citizens.

Lino Farrugia
Secretary - FKNK
