BirdLife Malta Infiltrate Education Department...

It is with deep remorse and resentment that the Federation for Hunting and Conservation – Malta (FKNK) notes the Department of Education's issue of calls for applications for the posts of Birdlife Malta teachers for both primary and secondary level education.

Birdlife is renowned for its anti-hunting lobby and more so for its gradual 'brain-washing' of our children through the supply of misinterpreted and misrepresented material facts, thus depriving them of a fair and unbiased platform about what the environment and conservation should be all about.

The FKNK seriously deploras this action and feels that it and its members' children are being gravely discriminated against. Whilst the applications are publicly issued, both the present Minister for Education and her predecessor, have to date refused to meet officials of the FKNK in order to be in a position to offer a level educational platform for our children.

Once again the Federation formally requests an urgent meeting with Minister Cristina in order to discuss these important issues that concern our children's education.
